2- Heading

How to give headings in markdown language

Heading 1

Heading 2

Heading 3

Heading 4

Heading 5

Heading 6

3- Block Of Words

To create block of words use symbol >

This is block of words by using this symbol >

This is **Second** Block

4- Line Break

To break the line we have to use this symbol \ from which we can give new line to our paragraph.

5- Combine Two Things

This is Block of words with Heading.

6- Face Of Text

To Italic our text we use this symbol ***, on starting and ending of our word or sentence.

This is a Italic text

To Bold our text we use this symbol ******, on starting and ending of our word or sentence.

This is a Bold text.

To Bold and Italic our text we use this symbol *********, on starting and ending of our word or sentence.

7- Bullet Points/ Lists

To create a bullet point list we use this symbol **-**, **+**, ***** in starting of our line.

- 1 bullet point
- 2 bullet point
- 3 bullet point
- 4 bullet point
 - 1 sub bullet point
 - 2 sub bullet point
- 5 bullet point
- 6 bullet point

8- Line Break/ Page Break

For Breaking page we use this symbol **---**, *******

This is First page

This is Second page

9- Links And Hyperlinks

To show **link** we use this symbol **<>**, inside this symbol we have to paste our link

<https://www.youtube.com/watch?v=qJqAXjz-Rh4>

To Show **Hyperlink** we use this symbol `[]`, `()` in our square brackets `[]` we have to write our text and in our round brackets `()` we have to paste our link.\

Markdown language in 72min

10- Key and Value Pair Of Link

to create key and value pair of our link we use this symbol `[]`, `:` in our square brackets `[]` we have to write our key (text) and after giving key in our square brackets `[]` we have to use colon `:` and after colon `:` we have to paste our link.

After creating key just write your key in square brackets `[]` and automatically the link will be open

whole course of python is [codanics](#)

11- Image and figure with Link

To show figure or image we have to use this symbol `[]`, `()`, in the square brackets `[]` we have to write our image/figure name and in round brackets `()` we have to put the link of image/figure.\

To see the Slide press [Here](#)

12- Adding Code/ Code Block

To highlight your **Code** use this symbol ``` or if you want to create a block of **Code** use this symbol `````.

```
print ("hello world")
```

```
x=20
y=30
z=y+x
Print (z)
```

This code will change color according to their syntax

```
x=80
y=90
z=y+x
Print (z)
```

13- Adding Tables

Column A	Column B	Column C
A1	B1	C1
A2	B2	C2
A3	B3	C3

By this code you can make this table

```
Column A | Column B | Column C
:-----:|:-----:|:-----:
A1 | B1 | C1
A2 | B2 | C2
A3 | B3 | C3
```
